Presidents Note-- Feb & March--2024

Good day fellow Members:

Today is Tuesday and as I look outside the window the snow is falling at a rate of leaving it in the driveway or plowing it I, will see if it melts.

As I set here I am thinking of this coming summer an the road trips we should go on. We all enjoy the "T" & "A" and the back roads. So lets get together and plan a drive in the near future.

I wouldn't mind going to the Hopeville State Park for a picnic or to the Up and Down Saw Mill , or the Chamberlain Saw Mill. We could go for a ride and stop for an ice cream, Just think of the places we went and lets go again. Maybe we will have an adventure or a surprise happening around the corner. At the next meeting Marty and the rest of the members will come up with some thing. If you have a destination or a comment let us know.

I also need pictures of your cars or trucks to put in the news letter. Even if it was last week or last year send them to me. I have some of your cars and trucks I will use them.

TIN LIZZIE GAZETTE

The national said we have the necessary members belonging to Model "T" Ford Club Of America, aka the national, to cover us on Club functions.

Thanks goes to **Pete** for the fine job of getting the roster in order. It must have taken a lot of effort and time to gather the info. that National needed. Thank You Pete..

While we thinking of Ins., Below is a story that came from the Vintage Ford magazine. It has to do with seat belts. If you install them , be sure to bolt them to a strong support.

Jack

PS: Don't forget your dues.

Marty said there isn't anything going on so he will see you next month. I bet he is riding around.

needed to get out sooner rather than later.
 The left door was slung open and my left arm was pinned between the car and the ground. Suddenly a man appeared on the passenger side door (which was now the top of the Model A) and was telling my wife to hold on, he would get her out.
 He, along with the help of the other Model A, drivers pulled her out. Once she was safe, he got down in the car with me and freed my arm up and

We had flown through the air and been flipped around. We were held in place by our seat belts, but the left door was flipped open and my arm was pinned between the car and the ground.

to avoid the safety cables between Highway OO and Interstate 44.

Moments later, the oncoming car struck my 1930 Model A Coupe head-on! Drivers behind me said my car went airborne. When we landed, the car was turned in the opposite direction and had landed on the highway cables. The impact removed

One minute we were on the highway, the next we were on our side, entangled in the barrier cables.
