# TIN LIZZIE GAZETTE

VOLUME XV  
ISSUE 8

## Presidents NOTE,

First, many thanks to Jack & Marge for organizing a very interesting tour to the Submarine Museum in Groton. There were certainly lots to see and learn about. I was especially impressed how subs have evolved, starting with the one-man pedal power sub ( used to put explosives under enemy ships ), then evolving to the Gato class subs which were powered by 96,000 gallons of fuel and could deliver numbers of torpedoes. And now, we have nuclear powered subs that can stay submerged almost indefinitely. I find this rapid evolution not too dissimilar to the automobile's history!

A second highlight of the month was...Ice Cream! We had perfect weather for it, hot and humid! This is what summer is all about...relaxing with friends while sitting under shade trees and devouring **UCONN**'s ice cream! The day was made even more special because we had a surprise visit from Andre and Joan. They were up from Tennessee visiting relatives and joined us for ice cream. It was certainly great to see them again!

We had a good month, thanks to everyone involved. Now on th August. We need a volunteer to organize a tour. Please call Jack if you are willing to help out.

Happy Motoring ,, Pete,,

# FOUR SEASONS MODEL "T" ASSOCIATION

## Late JULY and AUGUST HAPPENINGS

What is the difference between two yards?

A. Usually a fence.

What do you call a guy that seats at your door step?

A. A Matt

A clear conscience is usually the sign of a bad memory.
